DETAILED ACTION

This non final action is necessitated by the reconsideration of art not previously used but cited in the 892 of 5/5/05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 1,947,413 to Hay.

Regarding claim 1, 6, 7, 12, 15, 16, Hay discloses an anchor assembly having a tubular anchor body (fig. 3: 15&16), a baseplate (fig. 3: between 31 & 34), an arcuate conical portion (31) open at both ends and fitted to the end of the tubular body. Hay also discloses an area between the two components (where the number 30 is located) capable of frictionally fitting a post.

Regarding claim 2, 3, 8, 9, 17, Hay discloses a circular interior of the body and circular baseplate and a circular truncated cone (31).

Regarding claim 4, 10, 18, Hay discloses the conical portion as having an axially extending opening through the center.

Regarding claim 5, 11, 19, Hay discloses the base plate as having an outwardly extending flange (34).

Regarding claim 13, Hay discloses the circumference of the base as being continuous (fig. 2: 31).

Regarding claim 14, 20, Hay discloses the greatest radial dimension of the arcuate portion (fig. 2: where 14 points) as being greater than the greatest radial dimension of the conical portion.
